

GigaTrust GigaCloud 9.2.287

Release Notes September 2019

Dear GigaTrust Customer,

GigaTrust is pleased to announce the general availability of our new GigaCloud version 9.2.287. This release has several new features including:

- + Multiselect function from Managed users node
- + Option to configure SCP manually
- + Check for .NET 4.6.2 During Installation
- + Security question answer is invisible
- + Rename Feature to GTEP Communities
- + Sync agent generates alerts
- + Add Shell Menus Back in ALL UI Pages with Grids/Trees
- + Email address can use mix of lower and upper case
- + AD Sync Agent-logging now records group activities

Please see the Feature, Change Request and Fixed Defects sections below for further details.

We welcome your feedback about your experience with this release.

- To report any product defects please email us at support@gigatruster.com
- Existing customers can log tickets to the Helpdesk Support site <https://helpdesk.gigatruster.com/support/>
